Quality Policy

ATI S.r.l. is a company active in the stainless steel welded tubes field, with the main purpose to develop ever closer partnership relations with all the parties involved in its process, in compliance with the necessary requirements and the mandatory standards. ATI S.r.l. intends to pursue this aim through:

- ◇ A process-based approach supported by an accurate analysis of risks and opportunities, to develop, implement and improve the effectiveness of the quality management system in order to ensure a high quality standard
- ◇ The ability to identify the actual and future customer needs, and their markets and applications, in order to satisfy their requirements and to exceed their own expectations, seeking, with a critical and constructive dialogue, to constantly improve the reputation of the Company towards customers.
- ◇ The definition and continuous monitoring of shared and achievable objectives for each company function pursuing continuous improvement.
- ◇ The identification of technologically advanced equipments in respect of the environment and operator's safety at work, constant growth of internal know-how, high reactivity and flexibility, ability to supply products within requested delivery times, waste reduction.
- ◇ Training of operators in order to develop their professionalism, and active involvement of each company function, always maintaining a positive work environment.
- ◇ The continuous development of partnerships with suppliers of proven reliability through the continuous monitoring of their performances and potentiality.
- ◇ Respect the environment and the community through careful management of energy resources, aimed at minimizing inefficiencies and any potentially dangerous situations.

By observing and actively pursuing its Quality Policy, ATI S.r.l. intends to consolidate its competitiveness in the food, sanitary, chemical, automotive and heat exchanger sectors, and project itself with ambition towards new markets.
